

## Alert List for Entry in 2020

### New Programmes

#### **CR 430      Sport & Exercise Management (Level 8)**

This programme has been designed to cater for those who wish to pursue a career in the sport, exercise and health industries, both in Ireland and abroad.

Delivery is based on the combination of key theories with applied research and practical skills to afford graduates appropriate knowledge, skills and competencies to work as professionals in a wide range of settings in the sport, leisure and business industry.

#### **CR 440      BEd in Montessori Education (Level 8)**

This programme will:

- Enable graduates to specialise in their chosen field by offering specific niche modules in the education and care domain, e.g. Montessori: The Pre-School Child, Montessori: Middle Childhood, Montessori & Transformation, Introduction to the Arts and Learning Through Creativity.
- Ensure that graduates are appropriately prepared with the necessary skills for careers in the ECEC and SAC sectors. This aligns with 'First 5: A Whole-of-Government Strategy for Babies, Young Children and their Families' (2018), which outlines the importance of the workforce in delivering high quality ECEC and SAC, through the development of a professional workforce.
- Provide graduates with increased opportunities to apply for Level 9/10 programmes of postgraduate study. The breadth of study from birth to twelve years of age provides great scope for research across both early and middle childhood.

## CIT Mathematics Entry Examination 2020

Some students who apply for CIT courses may not achieve the required entry standard in Mathematics. For such applicants, CIT offers a second chance to reach the required entry standard through the CIT Mathematics Examination. This second chance facility allows applicants (depending on their results in the CIT Mathematics Examination) to gain entry to courses with an Ordinary Leaving Certificate Mathematics entry standard, and (with a higher-level performance) courses with a Higher-Level Certificate entry standard. Successful candidates are made an offer in Round 2.

**(Entry in 2020:** This Examination, which has traditionally taken place the week after the release of the Leaving Certificate Results, will take place after the release of finalised grades which is projected to be as close as possible to the traditional Leaving Certificate date. Once this date has been advised, the Institute will release a date for the 2020 Mathematics Entry Examination)

Updated –09 June 2020
