CAO Alert List for Entry 2022

(Revised 1st of June 2022).

CIT and ITT Merger January 2021 – important information re codes:

CAO Handbook. A guide to following the codes that are set up for the new entity:

MT 8xx and MT 9xx – for Level 8 programmes

MT7xx and MT5xx – for level 7 programmes

MT 6xx for Level 6 programmes

We have a number of exciting New Courses to the CAO Handbook

These may be added through **Change of Mind also for entry Sept 2022**

MT 844: Smart Product Engineering L8 (Cork Campus)

The Smart Product Engineering programme recognises the need for smart product engineers to integrate the competence of a variety of disciplines using a system engineering approach to both understand and meet user requirements.

The programme employs a novel teaching and learning approach focussed on developing product solutions from the outset whereas existing programmes tend to start with component analysis and building up to system development.

The programme delivery supports this teaching and learning approach with practical, studio-based projects and assessments giving students the opportunity to combine electronic engineering with manufacturing techniques and design methodologies to develop products and systems to meet customer requirements in authentic product development experiences.

This is the link for further information:

[CIT - Cork Institute of Technology - Smart Product Engineering \(BEng Honours\)](#)

Year 3 Food industry Project – from development to delivery in the office.

Career prospects – Food Business Management, Food product design, Food retail organisation, produce sales and marketing, gastro pubs etc

RE Name Change and enhancements to Course on the Cork Campus

MT551 has had a name change from Bachelor of Business Administration
To: **Bachelor of Business Technology and Communication**

[MT551 – Bachelor of Business in Business Technology and Communications](#)

Along with the name change there have been some key changes to course content.

The Business Technology and Communications programme will provide students with a unique blend of technology, communication skills and general business knowledge required for work in a technology driven business environment.

This is a practical, skills-focused programme, exposing students to the most up-to-date technologies which will allow graduates to work as individuals or in a collaborative team across business disciplines.

MT551 – Key Changes:

- Revised programme schedule with the introduction of new modules: Communications with Technology, Business Collaboration, Effective Communication, Media Publishing for Business and Integrated Financial Systems.
- Technology is embedded throughout the programme and students will significantly enhance their IT Skills including the use of MS Office applications and other collaborative technologies such as Zoom and Slack.
- Students' ability to summarise information and deliver effective individual and team presentations to live online and offline audiences will be developed to a high standard.
- Students will have the opportunity to study business modules in Management, Marketing, Human Resource Management, Supply Chain, Accounting, Digital Marketing, Web Design, and many more.

RE New Courses and QQI Links –

QQI-FET links are available on the CAO website and we also accept mature and other non-standard applicants.

School Liaison Officer with the Kerry Campus for School visits (details below)
